

Renewable Energy Resources Presentation Directions

Getting Started

Open Google Chrome and create two tabs

- In one tab, go to www.darvill.clara.net/altenerg
- In the second tab, go to gmail.com
 - Log in using your school email username and password
 - Username = firstname.lastname.fortcherry.org
 - Password = whatever you used to log on to the computer
 - Click on Drive (near top of screen)
 - Click on “Shared with Me” (left hand side of screen)
 - Double click on “Renewable Energy Resources” Presentation

Your assignment

1. You and your partner(s) will work together to summarize advantages and disadvantages of the renewable energy resource assigned to you (using the website from your prior webquest, which is listed above)
 - To find this information, click on the resource on the left hand side of the website
 - Then click on Advantages and Disadvantages
2. Each of you needs to write down the advantages and disadvantages in the appropriate block on the handout given to you
3. Then, type in your summary in the appropriate slide in the google document “Renewable Energy Resources” presentation
 - Use bullet points
 - SUMMARIZE
 - Put the advantages and disadvantages into your own words
 - DO NOT just copy and paste from the website
 - You can work on different computers at the same time as long as you are typing in different slides
 - You ALL need to contribute
4. Tomorrow, you will be presenting your renewable resource to the class

When you are finished

- You can add pictures to the title slide of your portion of the presentation
 - Note: Click on Insert and choose image. Then click “Search” to look for an appropriate image
- Practice your part of the presentation with your partner(s)
- Continue to explore the website and attempt some of the online quizzes
